

## **WT41N0**

## THE NEXT GENERATION IN RUGGED WEARABLE VOICE AND DATA MOBILE COMPUTERS

Easily increase productivity and eliminate errors in your warehouse or distribution center with next generation hands-free voice and data. With the major increase in package volume driven by multi-channel support, demands for the ultimate in customer service, plus increasing regulations for traceability, you need to move more items through your warehouse or distribution center and capture more information about those items than ever before. With the WT41N0 wearable mobile computer on the arms of your workers, you will. Now, workers can keep their hands and eyes on the materials they are handling — no time is lost handling paper or a handheld mobile device. Add a ring-style scanner worn on a finger and workers can capture 1-D and 2-D bar codes on the fly, able to document the path of that item for full traceability — and verify that the right items are in the right orders, shipped to the right customers at the right time. The result? Improved customer satisfaction and loyalty. More throughput with the same staff, driving staff utilization up. And less time spent capturing more information on item movement, driving the cost of compliance with traceability regulations down.

### SUPERIOR APPLICATION PERFORMANCE

The WT41N0 offers the most power of any device in its class, with a dual core processor and an operating system that can take advantage of both processors — Windows Embedded Compact 7, Microsoft's latest mobile operating system . Combined with 2GB Flash memory and support for 802.11a/b/g/n wireless LANs, this wearable mobile device delivers the processing power and network throughput required to deliver consistent, lightning-fast application performance and reliability.

### POWERFUL VOICE FUNCTIONALITY

A new built-in microphone enables push-to-talk (PTT) calls and voice-directed applications without a headset, helping reduce costs. The ability to simultaneously support multiple audio sources greatly enriches functionality.

### **ALL THE RIGHT ACCESSORIES**

Enrich the functionality of this hands-free solution with our complete accessory family. Our RS507 and RS419 ring scanners give your workers hands-free scanning that boosts productivity in the most scan intensive applications. Our rugged yet highly-cost effective cabled headset provides crystal clear voice in the noisiest and most demanding environments.

### READY FOR RUGGED ENVIRONMENTS

Workers can drop, bump or even spill liquid on the WT41N0, yet still expect reliable operation. In addition, the improved touchscreen has been hardened, making it virtually impervious to scratches. And stainless steel connectors combine with an improved coating on the rear cleat to eliminate corrosion and increase durability at accessory attachment points.

Improve the productivity and accuracy of your workers with best-in-class hands-free computing.

#### **FEATURES**

## Ergonomic hands-free wearable design

Award-winning ergonomic design increases user comfort and productivity

# High-performance nextgeneration platform

Best-in-class dual core processor provides the power to run virtually any enterprise application

### 802.11a/b/g/n WLAN

Easily connects to existing WLAN for fast integration; 802.11n and support for advanced Zebra's WLAN features greatly improves wireless network bandwidth, performance and reliability, while reducing power consumption and improving voice performance

# Supports text-only, voiceonly and combination text and voice applications

Eliminates the effort and cost associated with purchasing and supporting multiple hardware systems for different types of applications

### Supports Bluetooth Low Energy

Enhance locationing accuracy leveraging the WT41N0 and Zebra's MPact locationing and analytics platform using Bluetooth Low Energy/Wi-Fi hybrid technology for improved associate productivity and asset tracking.

## 2.8 in. color QVGA display with backlight

Excellent at-a-glance readability in nearly any lighting condition; optional hardened touchscreen improves display lifecycle and enables easy data input

### IP54 sealing; tumble tested; and a 4 ft./1.2 m drop specification across entire operating temperature range

Maximizes uptime and ensures dependable operation in demanding environments including cold storage; reduces device replacement costs

### Secure WLAN communications

Robust support for the latest security protocols keeps your data safe

### Backwards compatibility with all WT4000 accessories

Support for the wearable scanners, rugged headsets, cradles and cables for the WT4000 allows you to cost-effectively upgrade to the very latest in wearable technology

## Supports Zebra's best-inclass device management solution

Centrally manage your WT41N0 wearable computers as well as all other Zebra and third party mobile devices in use in your business with Zebra's Mobility Services Platform ( MSP)

### Supports Zebra Technologies RhoMobile best-in-class operating system-agnostic applications

Integrated support for RhoMobile applications allows easy and costeffective development and deployment of a single application version that runs on practically any device, regardless of operating system or screen size

Antenna Internal with Diversity			210, ARIB STD-66 & 33, ARIB	Duck to talk (DTT)
